

CAHIER DES CHARGES

Doulisha

The social platform for events & activities in Tunisia

Version	2.0 — scope extended from outdoor trips to all events and activities
Date	23 September 2026
Replaces	v1.0 of 22 September 2026 (outdoor trips only)
Status	Draft for review by the founder and pilot partners

In one sentence. Doulisha is where people in Tunisia discover what to do, organize anything from a mountain hike to a birthday, a padel match or a date night, invite their friends, and book the local providers who make it happen.

8. Non-functional requirements	17
9. Technical architecture	18
10. Business model and pricing	19
11. Roadmap, KPIs and risks	20
12. Open questions for the founder	22

0. What changed in version 2.0

Version 1.0 described Doulisha as an operating system for outdoor trips. Version 2.0 keeps everything that was specified for trips, but treats a trip as **one type of event among many**. The platform becomes an event-centred social network connecting participants, organizers, hosts, providers and brands.

Topic	v1.0 (outdoor)	v2.0 (all events)
Scope	Hiking, camping, cycling, beach, culture trips	Every kind of event and activity: trips, sports and padel, birthdays and private parties, couples experiences, concerts and parties, workshops, corporate and family events
Core object	Trip	Event, built from a category template on top of one of four event models (ticketed, group trip, private, slot booking)
Users	Participants, organizers, providers	Adds hosts (anyone organizing a private event), guests (invited without an account), venues and brands
Social layer	Feed and follows planned for V2	Social graph is core from the MVP: friends, follows, "friends going", event walls. Communities in V1
Providers	Bus, guides, gear, lodging; marketplace in V1	Adds venues, catering and cakes, decoration, DJs, photographers, animators, coaches. Directory in MVP, bookings in V1
New modules	14 modules	18 modules; new: EVT (event engine), TKT (tickets), INV (private events and invitations), SLT (venues and slot booking), SHR (external sharing, split from social)
Business model	Organizer subscriptions + payment fee	Adds ticketing fee, provider and venue commissions, gift-pool fee, promoted events
Roadmap	One vertical	Launch verticals chosen deliberately (section 11): outdoor trips + ticketed events and workshops + private invitations first; venues, padel and couples in V1

Key recommendation. The architecture must be generic from day one (one event engine, many templates), but the **launch** must stay narrow. Trying to open every category at once with a small team is the single biggest risk of v2.0 (see section 11.4).

1. Context and vision

Doulisha aims to become **the Facebook of events in Tunisia**: not a general-purpose social network, but a social graph built around events. Every profile, post, follow and message is attached to something people do together: an event, a place, an organizer, a provider or a community.

1.1 Problem

- **Public events and trips** (hikes, concerts, parties, workshops) are announced on Facebook pages, Instagram and WhatsApp groups. Organizers track attendees, payments (D17, cash, bank transfer) and logistics in spreadsheets, notebooks and chat threads.
- **Private celebrations** (birthdays, engagements, surprises, farewell parties) are organized in WhatsApp groups. The host calls five to ten providers (venue, cake, decoration, DJ, photographer) with no price transparency, collects money from friends by hand and loses track of who is coming.
- **Sports and activities** (padel, five-a-side football, classes) are booked by phone or Instagram DM; finding players of the right level is done in group chats.

- **Participants** have no single place to discover what to do this weekend, see which friends are going, compare offers or check an organizer's track record.
- **Providers and venues** depend on word of mouth, Instagram and informal calls, and cannot show availability or take bookings online.

1.2 Objectives

1. Let anyone create an event from their phone: under 2 minutes for a private invitation, under 5 minutes for a public event, under 10 minutes for a multi-day trip.
2. Give organizers one dashboard for attendees, tickets, payment status, check-in and logistics.
3. Make discovery social: see what friends and followed organizers are doing, and join with one tap.
4. Connect hosts and organizers with trusted local providers and venues, bookable inside the event plan.
5. Build trust through verification, reviews tied to real attendance and visible history.
6. Keep the social-media habit: every event becomes a shareable post, story or invitation for Facebook, Instagram and WhatsApp.
7. Accept the payments Tunisians actually use: cards and e-Dinar online, D17, cash and bank transfer with proof.

1.3 Event universe

Each category below is served by a template (section 6.2) built on one of four event models (section 6.1).

Category	Examples	Typical creator	Event model
Outdoor and trips	Hiking, camping, cycling, beach days, waterfalls, cultural excursions	Clubs, associations, guides, small agencies	Group trip
Sports and activities	Padel, five-a-side football, tennis, running, yoga, surf, kayak, climbing	Venues, coaches, clubs, groups of friends	Slot booking, open match, class
Private celebrations	Birthdays, engagements, baby showers, graduations, farewells, dinners at home	Any user acting as host	Private event
Couples and experiences	Date nights, romantic dinners, surprise packages, spa days, proposals	Providers (packages) or a host	Slot booking or private event
Entertainment and nightlife	Concerts, parties, festivals, stand-up, cinema clubs, exhibitions	Promoters, venues, associations	Ticketed event
Learning and workshops	Cooking, pottery, photography, dance, conferences, meetups	Trainers, associations, companies	Ticketed event, recurring class
Corporate and groups	Team building, seminars, school outings, company parties	Companies, agencies	Private event or trip, on quote
Kids and family	Kids' birthday parties, holiday camps, family days	Venues, animators, parents	Ticketed or private

Weddings are a large, specialized market. They are out of scope for the MVP and addressed later through the provider marketplace (V2).

1.4 Platforms

Platform	Primary users	Role
Mobile app (Android + iOS)	Participants, hosts, organizers	Main channel: discover, create, invite, book, pay, check in, chat, social feed
Web app	Everyone, including guests without the app	Event pages and SEO, invitation RSVP without account, organizer dashboard on desktop
Provider and venue space (web + app)	Providers, venues	Profile, catalog and packages, availability calendar, requests and bookings
Admin back-office (web)	Doulisha team	Verification, moderation, templates and categories, disputes, analytics

1.5 Target market

Tunisia first, users aged roughly 18–40, starting with Greater Tunis, Sousse and Sfax for urban categories and nationwide for outdoor trips. Languages: Tunisian Arabic/Arabic, French and English. Algeria and Morocco remain a later expansion option.

2. Benchmark of similar platforms

No existing platform combines social discovery, a free tool to create any kind of event, ticketing adapted to Tunisian payments, and a local provider and venue marketplace. Each competitor covers one slice.

2.1 Strengths and weaknesses

Platform	Type	Strong points	Weak points
Facebook Events and Groups	Social network	Everyone is there, friends going, free, groups	No tickets or payments in Tunisia, no attendee management, events lost in the feed, declining use by younger users
WhatsApp / Instagram	Current default channel	Huge reach, instant, trusted circles	No booking, no payment tracking, no lists, information lost, scams possible
IDWEY (TN)	Outdoor marketplace	Large outdoor catalog, social login, partners, eco angle	Catalog, not a tool; no Arabic; weak organizer profiles; no community features
Wildly (TN)	Outdoor experiences + gear	Android app, gear rental, free provider tools, reviews	Provider-centric; outdoor only; limited social layer
What To Do Tunisia (TN)	Activity booking by region	Online payment, regional browsing, phone support	Not community-driven; no organizer tools
Tunisian ticketing sites (e.g. Teskerti)*	Event ticketing	Online tickets for concerts and shows	Ticketing only: no social layer, no private events, no providers
Playtomic*	Padel and racket-sport booking	Court booking, open matches by level, split payment	Sports only; depends on venue adoption in Tunisia
Partiful / Luma*	Invitations and community events	Beautiful invitations, RSVP without account, social proof	Not available for Tunisian payments or providers; no marketplace
Eventbrite / Meetup*	Ticketing / communities	Mature ticketing, QR check-in, groups, waitlists	Per-ticket or organizer fees, no Tunisian payment methods, low local use

Platform	Type	Strong points	Weak points
GetYourGuide / Airbnb Experiences / Fever*	Experience marketplaces	Trust, polished booking, curation	High commissions, tourist-oriented, no private events
Defendr.gg (TN, esports)	Community + tournaments	Free for players, pro tools for organizers, XP and rewards, brand connections	Different domain; model to borrow (section 3)

* From general knowledge, not re-checked for this document. Verify availability in Tunisia and current pricing before using in investor or partner material.

2.2 What all platforms cover well

- Listing and discovery by category, place and date.
- Photos, price, capacity.
- Reviews and ratings.
- Social login and basic booking.

2.3 Gaps Doulisha fills

1. **One app for public and private events:** the same user buys a concert ticket, joins a hike and invites friends to a birthday.
2. **Social proof that sells:** "5 friends are going" on every event, friends' activity feed, communities.
3. **Organizer operations:** attendee lists, payment status per person (paid / deposit / pending), check-in, waitlist, transport.
4. **Local payments done right:** Konnect / Flouci (cards, e-Dinar), D17, and manual proof for cash and transfers; group split and gift pools.
5. **Provider and venue marketplace:** venues, cakes, decoration, DJs, photographers, buses, guides, coaches, bookable from the event plan.
6. **Trust layer:** verified organizers and providers, reviews tied to real attendance, visible history.
7. **Arabic (Tunisian) + French + English** interface.

3. Inspiration: Defendr.gg and social event apps

Defendr.gg, a Tunisian esports platform, maps closely onto Doulisha: players = participants, tournament organizers = event organizers, brands = providers and sponsors. Its loop remains the model: participants come back for XP, rank and profile; organizers pay only once they get value. Invitation apps such as Partiful add a second lesson: **private events are the fastest growth engine**, because every invitation brings new people to the platform.

Feature seen	Doulisha adaptation	Priority
Free for players, pro tools for organizers	Free for participants and hosts; organizer free trial then Pro plan	MVP
Slots counter + registration window	"18/25 places" live counter, booking opens/closes, auto-waitlist	MVP
Rules page per tournament	"Event brief": what to bring, dress code, rules, safety, cancellation policy	MVP
Organizer public page	Organizer profile: verified badge, events run, attendees, rating, gallery, followers	MVP

Feature seen	Doulisha adaptation	Priority
RSVP without account (Partiful, Luma)	Guests answer an invitation from a WhatsApp link without installing the app	MVP
Friends going (Facebook Events)	Friends' avatars and count on every event card	MVP
XP and leaderboards	"Doulisha passport": XP per attended event, badges per category and region	V1
Teams	Friend groups and communities: book together, split payment, group chat	V1
Brand connections	Sponsor module: brands sponsor events, offer discounts to high-level members	V2
Prizes and rewards	Rewards shop: XP converted into discounts	V2

4. Audit of the current MVP

The deployed MVP proves the concept visually for outdoor trips but is not yet usable end-to-end, and its positioning is outdoor-only. Checked on 22 September 2026.

Area	What exists	Gap to close
Positioning	Outdoor wording, hiking-focused categories, mountain logo	Rewrite home page and categories for all events; review whether the brand identity carries beyond outdoor (section 8)
Home page	Hero, search (destination, date, difficulty, travelers), featured trips	Only 1 featured trip; search fields are trip-specific (difficulty, travelers) and must become generic (what, where, when, for whom)
Trip pages	Trip card (Rtiba, 60 DT, 12 July 2026)	Detail link returned a 404; past trips still featured
Booking	"No account needed" booking promised	No payment step, no confirmation, no booking reference
Organizer dashboard	Mock dashboard with fill rates and "Create trip"	Real auth, attendee list, payment status, exports; "Create event" with category choice
Providers	"Coming soon" page with notify-me	Turn into a provider directory (MVP) then marketplace (V1)
Social	Community section on the home page	No profiles, friends, follows or feed yet
Languages	EN / FR switch	Arabic (RTL) missing
Trust and legal	Footer links	Privacy Policy, Terms and social icons link to #; no verification or reviews
Branding	Site uses "Dolisha", logo says "Doulisha"	Pick one spelling everywhere (domain, stores, handles)
Mobile	Responsive web only	Native app needed (Android first)

Quick wins before any new feature: fix the 404, hide past events, publish real Terms and Privacy pages, unify the name, connect social links, and change the home-page wording from "trips" to "events and activities".

5. Actors and roles

All roles share one account system. A user can hold several roles: the same person can buy a ticket, host a birthday and run a hiking club without a second account.

Role	Who	Main goals	Channel
Visitor	Anyone	Browse public events, read profiles, share	Web, app
Guest	Person invited to a private event, no account	View invitation, RSVP, contribute to gift pool; invited to create an account	Web link
Participant / member	Registered user	Discover, book, pay, follow, add friends, post, review, earn badges	App first, web
Host	Any member creating a private event	Invite, track RSVPs, collect contributions, book providers	App
Organizer	Club, association, promoter, coach, independent guide, small agency	Publish public events, sell tickets, manage attendees, payments, logistics, reputation	App + web dashboard
Co-organizer / staff	Team member invited by an organizer or host	Check-in, manage lists, message attendees (limited rights)	App
Provider / venue	Venue, caterer, pastry, decorator, DJ, photographer, animator, bus owner, guide, coach, gear rental, lodging, insurer	List services and packages, show availability, receive requests and bookings	Web + app
Brand / sponsor	Consumer brands (sport, food, telecom...)	Sponsor events and badges, offer rewards	Web (V2)
Admin	Doulisha team	Verify, moderate, manage templates, handle disputes, analytics	Web back-office

5.1 Ecosystem

Every booking flows through the event: participants, hosts and providers never need to coordinate outside Doulisha, while external networks remain the main entry door for new users.

6. Event model (new core concept)

To serve very different activities without building a separate product for each, Doulisha uses **one event engine** with **four event models**. Each category (hike, padel, birthday...) is a **template** that picks a model, pre-fills fields and switches modules on or off. Admins can create new templates without code.

6.1 Four event models

Model	What the creator does	Money flow	Key modules	Examples
A. Ticketed event	Publishes an event with places or tickets	Attendees pay organizer through Doulisha, or free RSVP	EVT, TKT, PAY, PRT, check-in	Concert, workshop, party, run, conference
B. Group trip	Model A + itinerary and logistics	Deposit + balance, cash or online	A + LOG (meeting points, vehicles, seats)	Hike in Ain Draham, Sahara weekend
C. Private event	Host invites people; no public listing	Usually none; optional gift pool, cost split, provider bookings	INV, COM, PRV	Birthday, engagement, surprise, dinner
D. Slot booking	Venue or provider opens resources and time slots	Customer pays venue/provider; split among players	SLT, PAY, PRV	Padel court, escape room, spa slot, couples package

6.2 Category templates

A template defines: the model, the fields shown in the creation wizard, the default brief, the default cancellation policy, the modules enabled, the visuals used for sharing and the search filters. Examples:

Template	Model	Specific fields and behaviour
Hiking trip	B	Difficulty 1–5, distance, elevation, GPX, meeting points, vehicles, weather alert
Padel match	D (or A for tournaments)	Venue and court, level range, 4 players, open spots visible to players of similar level, split payment
Birthday	C	Guest of honour, theme, surprise mode, guest list and RSVP, gift pool, suggested providers (venue, cake, decoration, DJ, photographer)
Date night / couples	D or C	Packages for 2, time slot, add-ons (flowers, cake, photographer), discreet notifications
Concert / party	A	Ticket types (early-bird, VIP), age limit 18+, lineup, door check-in
Workshop / class	A (recurring)	Sessions, level, materials included, packs of sessions
Team building	C or B, on quote	Company, headcount, budget, request for quote to several providers

6.3 Public event lifecycle (models A and B)

Full returns to **Published** when a cancellation frees a place (waitlist offered automatically). Drafts are private and free during the trial. Completed events unlock reviews, the photo album, memories and XP.

6.4 Private event and booking lifecycles (models C and D)

Flow	States
Private event (C)	Draft → Invitations sent → Happening → Completed (album, memories) · or Cancelled (guests notified)
RSVP (C)	Invited → Seen → Going / Maybe / Not going; +1s; reminder to "Maybe" at D-3
Slot booking (D)	Requested (if request-to-book) → Confirmed → Paid → Used · or Cancelled / No-show
Provider request (PRV)	Request sent → Quotes received → Accepted → Deposit paid → Delivered → Reviewed

7. Functional requirements

Features are grouped in 18 modules. Priority: **MVP** = needed for the public launch with pilot users; **V1** = within 6 months after launch; **V2** = growth phase. Modules or rows marked (template) apply only to the categories that enable them.

7.1 Accounts and profiles (ACC)

ID	Feature	Description	Priority
ACC-01	Sign-up / login	Phone number (OTP SMS), email, Google, Facebook, Apple; guests RSVP with a magic link and no password	MVP
ACC-02	Personal profile	Photo, name, city, interests (categories), optional birthday, sport levels (e.g. padel 1-7); private emergency contact and medical notes	MVP
ACC-03	Organizer profile	Name, logo, bio, cover, categories, regions, social links, legal status (association, company, independent)	MVP
ACC-04	Verification	Upload ID, association registration (JORT), company registration (RNE), tourism licence where required; admin approves; verified badge	MVP
ACC-05	Multi-role	Same account acts as participant, host, organizer and provider	MVP

ID	Feature	Description	Priority
ACC-06	Privacy settings	Profile public / friends / private; who can invite me; who sees which events I attend	MVP
ACC-07	Team members	Invite co-organizers with roles (admin, staff, check-in only)	V1

7.2 Event creation and publishing (EVT)

Replaces the v1.0 TRP module; trip-specific items move to templates and LOG.

ID	Feature	Description	Priority
EVT-01	Create event wizard	Step 1: choose category, which loads the template. Mobile-first steps, auto-saved drafts	MVP
EVT-02	Core fields	Title, category, dates and times, place (venue, address, map pin, or "revealed after booking"), cover, description, language, age limits	MVP
EVT-03	Visibility	Public, unlisted (link only), private (invite only); community-only in V1	MVP
EVT-04	Capacity	Max places, minimum to confirm, waitlist on/off	MVP
EVT-05	Event brief	What to bring, dress code, rules, safety, cancellation policy (flexible / moderate / strict)	MVP
EVT-06	Programme	Timeline for one-day events; day-by-day itinerary with optional GPX for trips (template)	MVP
EVT-07	Media	Up to 15 photos, cover, short video	MVP
EVT-08	Duplicate	Copy a past event to re-run it with new dates	MVP
EVT-09	Category templates	Admin-managed templates: model, fields, default brief, modules, share visuals, filters	MVP
EVT-10	Recurring events	Weekly classes, every-Saturday runs, several dates for one event	V1
EVT-11	Co-hosting	Several organizers or hosts on one event, shared dashboard	V1
EVT-12	Custom theme	Colours, fonts and invitation design for private events	V1

7.3 Tickets and registration (TKT)

ID	Feature	Description	Priority
TKT-01	Registration types	Free RSVP, paid ticket, deposit + balance, pay at the door	MVP
TKT-02	Ticket types	Standard, early-bird, VIP, student, couple (2 people), group	MVP
TKT-03	Custom questions	Asked at booking: level, T-shirt size, meal choice, pick-up point	MVP
TKT-04	E-ticket	Reference, QR code, add to calendar, email and push	MVP
TKT-05	QR check-in	Scanner in the organizer app, works offline, live attendance count, absent list	MVP
TKT-06	Promo codes	Percentage or amount, limited uses, per ticket type	V1
TKT-07	Ticket transfer	Give a ticket to a friend; name changes on the QR	V1
TKT-08	Seated events	Seat map for theatres and venues	V2

7.4 Private events and invitations (INV)

New in v2.0. This module is free and drives growth: every invitation brings new users.

ID	Feature	Description	Priority
INV-01	Quick private event	Title, date, place and a designed cover in under 2 minutes	MVP
INV-02	Invitations	Invite Doulisha friends, phone contacts or share a WhatsApp link; guests RSVP on the web without the app	MVP
INV-03	RSVP	Going / maybe / not going, +1s, dietary notes, automatic reminders, guest list visible to the host	MVP
INV-04	Surprise mode	Event hidden from the guest of honour; co-hosts plan together	V1
INV-05	Gift pool and cost split	Online contributions toward a target (gift, venue, cake), transparent list, payout to host	V1
INV-06	Planning board	Checklist, budget and providers booked (venue, cake, decoration, DJ, photographer)	V1
INV-07	Shared album	Guests upload photos after the event; host moderates	V1
INV-08	Birthday reminders	Friends' birthdays with "organize something" suggestions	V1
INV-09	Wishlist	Guest of honour's wishlist; guests reserve items	V2

7.5 Venues, resources and slot booking (SLT)

New in v2.0 for padel and sports centres, escape rooms, spas, restaurants and couples packages.

ID	Feature	Description	Priority
SLT-01	Resource setup	Courts, rooms, tables or equipment with capacity and opening hours	V1
SLT-02	Availability and pricing	Calendar, slot length, peak / off-peak prices, per hour or per person	V1
SLT-03	Booking mode	Instant booking or request-to-book, deposit rules, cancellation window	V1
SLT-04	Open match	A player books a court and opens remaining spots to players of a similar level; automatic split payment	V1
SLT-05	Classes and coaches	Book a lesson with a coach; group classes with capacity	V1
SLT-06	Packs and memberships	10-session packs, monthly memberships, balance tracking	V2
SLT-07	Calendar sync	Google Calendar / iCal sync for venues already using another tool	V2

7.6 Discovery and search (DSC)

ID	Feature	Description	Priority
DSC-01	Search	What, where, when, category, price, free/paid, for whom (solo, couple, friends, family, kids), level, places available	MVP
DSC-02	Home: "What to do"	Tonight / this weekend / nearby, personalized by city and interests	MVP
DSC-03	Event page	Details, organizer card, places left, friends going, reviews, share, book or RSVP button	MVP

ID	Feature	Description	Priority
DSC-04	Friends going	Avatars and count of friends going or interested on every card	MVP
DSC-05	Favorites and interested	Save events; "interested" is visible to friends	MVP
DSC-06	Map view	Events and venues on a map	V1
DSC-07	Collections	Curated lists ("Date ideas in Tunis", "Beginner padel", "Hikes under 50 DT")	V1
DSC-08	SEO pages	City × category pages ("Padel Sousse", "Randonnée Ain Draham") indexed by Google	V1
DSC-09	Recommendations	Based on history, friends, level, budget and location	V2

7.7 Booking and payments (PAY)

ID	Feature	Description	Priority
PAY-01	Unified checkout	One flow for tickets, slot bookings, provider deposits and gift-pool contributions	MVP
PAY-02	Payment methods	Online: card and e-Dinar via Konnect or Flouci; D17; offline: cash or bank transfer with proof upload	MVP
PAY-03	Deposit + balance	Pay a deposit now, balance before a deadline, automatic reminders	MVP
PAY-04	Cancellation and refunds	Applied from the event policy; organizer approves refunds	MVP
PAY-05	Split payment	One person books for friends; each pays their share	V1
PAY-06	Payouts	Balance per organizer, provider or host; payout to bank (RIB) after the event; statements	V1
PAY-07	Held funds for new sellers	For unverified or new organizers, online payments released after the event is completed	V1
PAY-08	Invoices	Receipts for buyers; invoices for subscriptions and commissions (VAT 19%)	V1

7.8 Attendee management (PRT)

ID	Feature	Description	Priority
PRT-01	Attendee list	Name, phone, ticket type, payment status (paid / deposit / pending / refunded), answers, notes	MVP
PRT-02	Manual add	Add people who booked by phone or WhatsApp	MVP
PRT-03	Payment validation	Mark cash or transfer received; approve uploaded proofs	MVP
PRT-04	Waitlist	Auto-offer freed places in order	MVP
PRT-05	Export	PDF / Excel for insurance, police checkpoints, bus driver, venue door	MVP
PRT-06	History	Events attended with this organizer, no-show count	V1
PRT-07	Re-invite	Invite past attendees or segments to a new event	V1

7.9 Logistics (LOG, template)

Mainly for trips; the checklist and budget apply to every event.

ID	Feature	Description	Priority
LOG-01	Meeting points	Several pick-up points with times; participant chooses one	MVP
LOG-02	Vehicles	Buses, minibuses, cars with seat count; auto-assign participants	V1
LOG-03	Checklist	To-do per event (venue confirmed, bus, food, insurance, sound)	V1
LOG-04	Budget	Costs vs revenue, profit per event	V1
LOG-05	Carpooling	Participants offer or request seats	V2
LOG-06	Route optimisation	Suggested pick-up order and timing	V2

7.10 Social network (SOC)

The layer that makes Doulisha "the Facebook of events". Promoted from V2 to MVP for its basics.

ID	Feature	Description	Priority
SOC-01	Follow	Follow organizers, venues, providers and communities; notified of new events	MVP
SOC-02	Friends	Mutual friendship; find friends from contacts with explicit consent	MVP
SOC-03	Activity feed	Friends' upcoming events, new events from followed accounts, posts	MVP
SOC-04	Event wall	Posts, questions, photos and comments on each event page	MVP
SOC-05	Reactions and comments	Like, react and comment on posts and photos	MVP
SOC-06	Communities	Clubs, running crews, padel groups: members, events, wall, admins	V1
SOC-07	Memories	Post-event recap, album, "I was there" card	V1
SOC-08	Tags	Tag friends in photos, with their approval	V1
SOC-09	Suggestions	People you may know, events your friends like, ranked feed	V2

7.11 External sharing (SHR)

Was SOC in v1.0. Doulisha feeds Facebook, Instagram and WhatsApp instead of fighting them.

ID	Feature	Description	Priority
SHR-01	Share	One-tap share to Facebook, Instagram, WhatsApp, Messenger, TikTok, copy link	MVP
SHR-02	Auto visuals	Post (1:1), story (9:16) and invitation cards generated from event data, per category style, in AR/FR/EN	MVP
SHR-03	Smart links	Opens the app if installed, else the web page; Open Graph preview	MVP
SHR-04	UTM tracking	Organizers see which network brought bookings	MVP
SHR-05	Direct publish	Publish to a connected Facebook Page / Instagram Business account	V1

ID	Feature	Description	Priority
SHR-06	Referral	Share a code; both get a discount	V1

7.12 Communication and notifications (COM)

ID	Feature	Description	Priority
COM-01	Push, email, SMS	Booking, payment, RSVP, reminders (D-3, D-1, start), changes, cancellation	MVP
COM-02	Broadcast	Organizer or host messages all attendees or guests	MVP
COM-03	WhatsApp link	Auto-invite to the event's WhatsApp group after booking	MVP
COM-04	Notification preferences	Per type and channel; quiet hours	MVP
COM-05	Direct messages	User ↔ organizer, host ↔ provider (quotes), with reporting	V1
COM-06	Event chat	Group chat per event or community	V1
COM-07	Weather alerts (template)	Forecast for outdoor events with clothing suggestions	V1

7.13 Trust, safety and moderation (TRS)

ID	Feature	Description	Priority
TRS-01	Verified reviews	Only checked-in attendees or confirmed customers rate organizers, venues and providers	MVP
TRS-02	Public stats	Events completed, attendees served, cancellation rate, response time	MVP
TRS-03	Report and block	Report an event, post, user, organizer or provider; block users	MVP
TRS-04	Content moderation	Automatic filters for photos and text + human review queue; target: reports handled within 24 h	MVP
TRS-05	Age rules	Age-gated events (18+ nightlife); minors have no public profile; kids' activities booked by parents	MVP
TRS-06	Private-event privacy	Private events never indexed or listed; guest lists visible only to hosts and guests	MVP
TRS-07	Emergency info (template)	Emergency contacts visible to the organizer on the day; SOS shares location	V1
TRS-08	Insurance	Optional event insurance from a partner insurer	V2

7.14 Community and gamification (GAM)

ID	Feature	Description	Priority
GAM-01	Doulisha passport	Public profile with events attended, categories, regions, photos	V1
GAM-02	XP and levels	XP per attended event, review, referral, invitation accepted	V1
GAM-03	Badges	Per category and region (Summits of Tunisia, Kroumirie trails, Padel regular, Workshop explorer)	V1

ID	Feature	Description	Priority
GAM-04	Leaderboards	Monthly top members, organizers and venues	V2
GAM-05	Rewards	Spend XP on discounts from organizers, venues and partner brands	V2

7.15 Provider and venue marketplace (PRV)

ID	Feature	Description	Priority
PRV-01	Provider directory	Profiles by type and city with photos, price range, contact by call or WhatsApp; replaces the "coming soon" page	MVP
PRV-02	Provider types	Venues (halls, restaurants, cafés, villas, sports centres), catering and cakes, decoration and flowers, DJ and sound, photo and video, animators, transport, guides and coaches, gear rental, lodging, insurance	MVP
PRV-03	Catalog and packages	Services and ready packages ("Birthday 30 guests", "Romantic dinner for 2") with prices	V1
PRV-04	Request for quote	Host or organizer describes the need once; several providers answer; comparison view	V1
PRV-05	Booking and deposit	Book and pay a provider inside the event plan	V1
PRV-06	Availability calendar	Blocked dates, capacity per day	V1
PRV-07	Direct experiences	Packages sold directly to consumers (couples, spa, workshops)	V1
PRV-08	Provider dashboard	Requests, calendar, revenue, reviews	V1
PRV-09	Add-ons at booking	Gear rental, cake, photo pack added while booking an event	V2

7.16 Organizer tools and subscription (ORG)

ID	Feature	Description	Priority
ORG-01	Dashboard	Upcoming events, fill rate, revenue, pending payments	MVP
ORG-02	Subscription	Trial, plans, billing, upgrade / downgrade	MVP
ORG-03	Analytics	Views, shares, conversion, repeat attendees, best-selling categories	V1
ORG-04	Branded page	doulisha.tn/club-name with colours and logo	V1
ORG-05	Promotion	Boost an event on the home page, feed or collections	V1

7.17 Administration (ADM)

ID	Feature	Description	Priority
ADM-01	Verification queue	Approve organizers, venues and providers	MVP
ADM-02	Moderation	Events, posts, comments, reviews, photos, reports	MVP
ADM-03	Disputes and refunds	Participant-organizer and host-provider conflicts	MVP
ADM-04	Content and templates	Categories, templates, collections, featured events, banners, blog	MVP

ID	Feature	Description	Priority
ADM-05	KPIs	Users, events by model, bookings, GMV, subscriptions, commissions, churn	MVP

7.18 Smart features (AI)

ID	Feature	Description	Priority
AI-01	Description assistant	Generate description, brief and invitation text in AR/FR/EN from a few inputs	V1
AI-02	Moderation support	Classify photos and text to prioritize the review queue	V1
AI-03	Clothing by weather	Packing list from forecast and event type	V1
AI-04	"Plan my event"	"Birthday for 20 people in Sousse, 1,500 DT" → checklist, budget and matching providers	V2
AI-05	Budget suggestions	"Things to do under 50 DT this weekend"	V2
AI-06	Matching	Players by level, solo travellers by interests	V2
AI-07	Performance insights	Price and date suggestions from past events	V2

8. Non-functional requirements

The app must work on mid-range Android phones over 3G/4G, in three languages, with Tunisian payment methods, Tunisian data-protection law and user-generated content at scale.

Area	Requirement
Languages	Arabic (RTL, Tunisian-friendly wording), French, English; auto-detected, switchable anytime; event content written in one language and auto-translated (V1)
Performance	Event list and feed load in under 2 s on 4G; app under 40 MB; images in WebP, lazy-loaded
Peak load	Ticket release for a popular event: 2,000 tickets sold in 10 minutes without overselling (queue + stock locking)
Offline	Tickets, event details, itinerary, attendee list and QR check-in available without network
Availability	99.5% uptime; daily backups kept 30 days
Security	HTTPS everywhere; hashed passwords; OTP for phone login; role-based access; payment data never stored (gateway); rate limiting; anti-bot on sign-up and ticket sales
Privacy	Private events and guest lists never public or indexed; attendance visibility follows user settings; contact import only with consent and never stored in clear
Moderation	Reports acknowledged immediately and handled within 24 h; illegal content removed; audit log of moderation actions
Data protection	Law 2004-63 on personal data (INPDP declaration); consent for medical, emergency and contact data; right to delete account; GDPR-compatible for EU users
Payments	Prices in TND; VAT 19% on subscriptions and commissions; Konnect and/or Flouci (cards, e-Dinar, wallet), D17; offline proofs
Accessibility	Readable contrast; minimum 44 px touch targets; screen-reader labels
Compatibility	Android 8+, iOS 15+, latest 2 versions of Chrome, Safari, Firefox, Edge

Area	Requirement
Scalability	10,000 monthly active users and 500 concurrent bookings at launch; designed to reach 100,000 MAU without redesign
Legal documents	Terms of use, privacy policy, organizer agreement and provider agreement (Doulisha is an intermediary), refund policy, community guidelines, cookie banner
Brand	Logo and palette (green #2F5D3A, terracotta, cream). The mountain + sun mark reads as outdoor: decide whether to keep it as the master brand, soften it, or keep it for the outdoor category only (open question 12)

Open legal questions (to confirm with a lawyer). (1) Commercial trip organization may require a travel-agency licence; which organizers can Doulisha accept? (2) Public events may need authorizations (municipality, governorate); what does Doulisha check? (3) Collecting and redistributing money (tickets, gift pools, held funds) may fall under payment regulation; can it be done entirely through a licensed gateway? (4) Platform liability for incidents, for 18+ events and for user posts. (5) Electronic commerce obligations under law 2000-83.

9. Technical architecture

Recommended: keep the existing Next.js web app and add a React Native (Expo) app sharing one TypeScript API and one PostgreSQL database, so a small team works in one language end to end. The new requirement is a **generic event engine**: common tables for all events, plus template-defined fields stored as validated JSON.

Layer	Recommended choice	Why
Mobile	React Native with Expo (Android first, iOS next)	Same TypeScript as the web; one codebase; OTA updates
Web	Next.js (existing) with server-side rendering, on Vercel	SEO for event, city and category pages; web RSVP for guests
Backend	Supabase (Postgres, auth, storage, realtime) for the MVP; NestJS services when custom logic grows	Fastest start; realtime covers feed, chat and live counters
Database	PostgreSQL + PostGIS; JSONB for template fields with schema validation	Relational bookings and payments; geo queries; flexible categories without migrations
Event engine	Event, Template and Occurrence tables; modules enabled per template	One codebase for trips, matches, birthdays and concerts
Search	Postgres full-text + PostGIS for MVP; Meilisearch or Typesense in V1	Fast multilingual search with filters
Ticket stock	Row-level locking or reservation holds with expiry; job queue	No overselling during ticket rushes
Payments	Konnnect and/or Flouci API; D17; payment and payout ledger	Local methods; clear balances per organizer, provider and host
Notifications	Firebase Cloud Messaging, transactional email (Resend/Brevo), local SMS provider	Push is free; SMS for OTP and critical reminders
Moderation	Image and text moderation API + admin queue	User-generated content from day one
Social visuals	Server-side image generation (Satori / @vercel/og)	Posts, stories and invitation cards per event
Deep links	Android App Links + iOS Universal Links (or Branch)	Shared links open the app or fall back to web

Layer	Recommended choice	Why
Maps and weather	Mapbox or OpenStreetMap tiles; GPX parsing; weather API	Venues and trails
Analytics	PostHog or Firebase Analytics + Sentry	Funnels, virality tracking, crash reports

9.1 Core data model

Identity and social: User, Profile, OrganizerProfile, ProviderProfile, Friendship, Follow, Community, Membership, Post, Comment, Reaction, Media, Report, Block.

Events: Category, Template, Event, Occurrence, ItineraryStep, MeetingPoint, TicketType, Question, Invitation, RSVP, Checklist.

Commerce: Order, Booking, Attendee, Payment, Refund, Payout, Ledger, GiftPool, Contribution, Subscription, PromoCode, Invoice.

Venues and providers: Venue, Resource, Slot, Service, Package, ServiceRequest, Quote, Vehicle, SeatAssignment.

Engagement: Review, Badge, XPEvent, Notification.

9.2 Social-media integration

1. MVP: native share sheet, Instagram Stories share with the generated image, WhatsApp share with prefilled text and link, Open Graph tags.
2. V1: publish directly to a Facebook Page or Instagram Business account through the Meta Graph API (requires Meta app review).
3. Every shared link carries UTM parameters so organizers see which network brought bookings, and Doulisha measures its viral loop.

10. Business model and pricing

Participants, guests and hosts of private events use Doulisha for free. Revenue comes from those who earn money through the platform: organizers, venues and providers. All prices below are hypotheses to test with pilot users.

10.1 Free-trial strategy for organizers

1. Organizers sign up and create drafts freely, no card required.
2. First 3 published paid events (or 60 days, whichever comes first) are free with all Pro features.
3. The Doulisha team onboards the first 20–30 organizers and 20–30 providers personally.
4. At the end of the trial, the organizer picks a plan; drafts and history are never deleted.

10.2 Plans (indicative, TND excl. VAT)

Plan	Price	Includes
Free (everyone)	0	Private events and invitations, free public events up to 50 attendees, sharing
Organizer Starter	Free	1 active paid event, up to 30 attendees, basic list
Organizer per event	15–25 DT per published paid event	All MVP features for that event, no subscription

Plan	Price	Includes
Organizer Pro	49–79 DT / month	Unlimited events, team members, analytics, logistics, branded page, priority listing
Provider / venue Pro	39–99 DT / month	Catalog and packages, calendar, slot booking, featured placement, statistics
Club / agency / company	On quote	Several accounts, API and exports, dedicated support

10.3 Transaction revenue

Stream	Model
Online payment fee	2–4% per ticket or booking paid online (covers gateway cost, about 1.3% on local cards per Mallatech)
Marketplace commission	5–10% on provider and venue bookings made through Doulisha (packages, quotes accepted, slots)
Gift pools	Small fee on contributions, capped, covering gateway cost
Promotion	Boosted events and providers in the home page, feed and collections
Sponsors and brands	Sponsored events, badges and rewards (Defendr-style brand connections), V2
Partners	Commission on insurance and gear rental, V2

11. Roadmap, KPIs and risks

Target: a usable MVP+ on web and Android by end of December 2026, before the spring season, with a deliberately narrow set of launch verticals and a generic engine underneath.

11.1 Launch verticals

Vertical	When	Why
Outdoor trips	MVP	Existing demo, community and know-how; high organizer pain; the flagship category
Ticketed events and workshops	MVP	Same organizer tools as trips (model A); many small organizers on Instagram
Private invitations (without providers)	MVP	Cheap to build, free for users, viral: each invitation brings new people
Venues, padel and sports	V1	Needs slot booking and venue onboarding; strong recurring usage
Birthdays with providers, couples experiences	V1	Needs the provider marketplace, quotes and payments to providers
Corporate, kids, weddings	V2	Longer sales cycles and specialized needs

11.2 Roadmap (proposed)

Phase	Period	Scope	Exit criteria
0. Fix and reposition	Oct 2026 (2 weeks)	Quick wins from section 4, unified name, legal pages, analytics, home page reworded for all events	No broken links; Terms and Privacy live
1. MVP+	Oct–Dec 2026	Event engine and templates; ACC, EVT, TKT, INV, DSC, PAY, PRT, SOC, SHR, COM, TRS, ADM items marked MVP; provider directory; Android app; AR/FR/EN	15 pilot organizers run 30 real events end to end; 300 private events created
2. V1	Jan–Jun 2027	iOS; provider marketplace; venues and slot booking (padel); gift pools and split payment; communities; gamification; paid plans	100 paying organizers and providers; 3,000 bookings per month
3. V2	Jul–Dec 2027	Seated ticketing, AI event planner, recommendations, rewards and sponsors, carpooling, insurance, weddings, Maghreb study	Positive unit economics per organizer and provider

11.3 KPIs

KPI	Target at 6 months after launch
Monthly active users	15,000
Events created per month (public / private)	400 / 1,500
Bookings and tickets per month	3,000
Guests who create an account after an invitation	20%
Active organizers (≥1 published event per month)	80
Active providers and venues (≥1 booking per month)	40
Trial-to-paid conversion (organizers)	30%
Share-to-booking conversion	5%
Participant repeat rate (2+ events)	35%
Average organizer and provider rating	≥ 4.5 / 5
App store rating	≥ 4.3

11.4 Risks

Risk	Mitigation
Scope creep: building every category at once	Generic engine, narrow launch (11.1); a new category needs a template, not new code; strict MVP list
Cold start on several marketplaces	Launch where Doulisha already has supply (outdoor); private invitations bring demand for free; onboard providers by hand in 2–3 cities
Competing with Facebook and Instagram for attention	Do not build a general social network; own the event layer and keep feeding those networks through sharing
Moderation load and harmful content	Moderation from day one, community guidelines, reports within 24 h, verified organizers
Privacy incident on private events	Private by default, never indexed, guest lists restricted, privacy review before launch

Risk	Mitigation
Low online-payment adoption	Cash and transfer with proof; online optional at first; split and gift pools make online natural
Fraud: fake events and tickets	Verification, held funds for new sellers, QR tickets, reviews tied to attendance
Brand dilution for the outdoor community	Keep outdoor as a flagship category with its own identity and badges
Legal status of organizers and money flows	Legal review; organizer and provider agreements; licensed gateways only
Competition from IDWEY, Wildly, ticketing sites or Playtomic	Move fast on what they lack: social graph, private events, Tunisian payments, all-in-one
Small team capacity	Supabase + Expo; one TypeScript codebase; templates instead of custom screens

12. Open questions for the founder

1. **Brand:** does "Doulisha" and the mountain + sun logo stay the master brand for all events, or does the identity evolve?
2. **Second vertical:** after outdoor and ticketed events, which one first in V1: padel and venues, or birthdays and couples with providers?
3. **Money:** should Doulisha collect payments for organizers and providers (marketplace model), or only connect them and charge subscriptions?
4. **Cities:** which 2–3 cities for provider and venue onboarding?
5. **Team:** who handles moderation and provider onboarding in the first 6 months?

12.1 Deliverables

- Updated UI/UX mockups (mobile + web) for all four event models, including Arabic RTL screens.
- Category template catalog (fields, briefs, policies, share visuals) for launch verticals.
- Android app on Google Play; iOS app on App Store (V1).
- Web app, provider space and admin back-office.
- API documentation and database schema.
- Test plan and pilot report (organizers, hosts, providers).
- Terms of use, privacy policy, organizer and provider agreements, community guidelines.

Sources

Carried over from v1.0: Doulisha MVP and providers page; Defendr.gg home, pricing, tournaments, about; IDWEY, Wildly, What To Do Tunisia; Meetup organizer pricing; Mallatech on online payment in Tunisia 2026, Konnect, Flouci API. Added in v2.0 from general knowledge, not re-checked for this document: Facebook Events, Tunisian ticketing sites (e.g. Teskerti), Playtomic, Partiful, Luma, Eventbrite, Fever, GetYourGuide, Airbnb Experiences.
